An 'Extra Hand' - to help you through...

The workload and responsibilities of Local Council Clerks continues to grow both in the scope and levels of work expected. Vision ICT Ltd. is aware that with all the best intentions maintaining your website on a regular basis is a task that sometimes is just not achieved to the level and standard you would wish in an ideal world. Through talking with many of our clients we are aware that an 'Extra Pair of Hands' to ease the burden and ensure that your website is used to its full potential without additional worry for you would make all the difference.

You know how important it is to keep your website up to date, not only with the Agendas and Minutes, but in adding important local information, news stories, pictures and all the many other additional items of information you would wish to add to your website if only you had a little more time. Indeed we know that many Clerks would like to utilise their Council website to achieve additional functions and interact with the community more such as improving consultation, if only more time was available to you.

We also know how much many of you enjoy being in control of your own website and working on its development. You tell us how easy you are finding Vision Websites to use and that you could do so much more if you had someone to do the 'basic' changes - "I just need an extra pair of hands" is often heard.

In response to the above Vision ICT Ltd is now pleased to extend our support services to our clients and can now offer a series of packages designed to provide you with an increased level of help and support that will meet your needs.

At a glance

- ⦿ Your website kept up to date
- ⦿ Relieves you of the responsibility
- ⦿ Frees up your valuable time
- ⦿ A variety of support packages available
- ⦿ Only pay for the level of support needed
- ⦿ Change the level of support at any time
- ⦿ Discounts available for smaller councils
- ⦿ Starts from Approx. £22 a month

"Vision ICT Ltd. provide advice and update our website as often as required. It all works well and ensures our website is always looking smart and up to date."
